

CSE 111 – Database Systems

Team Evaluation

Grade each team member, including yourself, on a scale from 1 to 15 (1 is the lowest and 15 is the highest). Consider the participation each team member had in each of the project stages. Try to be as objective as possible.

Team member	DB design (1-15)	DB implementation (1-15)	Application development (1-15)	Presentation & demo (1-15)	Overall participation (1-15)
Ahmad Suleiman	13	15	15	15	15
Vedaant Vyas	15	13	15	15	15

Using the same scale from 1 to 15, evaluate how proficient you are on the following teamwork skills:

- resolve conflicting design ideas (1-15)
 - 12
- delegate responsibilities fairly between team members (1-15)
 - 12
- complete your assigned tasks on time (1-15)
 - 15
- What are the most important things you learned about working in a team?
 - It's important to communicate well with your teammates and establish a good work division so that working together can be conflict free and optimized.
- What are the most important challenges of working in a team that you encountered? How did you solve these challenges?
 - Busy-waiting, where one of us may have had to wait on another since our work was built linearly. If we divided our work a little better, we could have optimized the amount of time it took to complete the project
- If you would have to do the project again, would you choose the same team?
 - Yes, I enjoyed working with my team and would do it again.
- Provide any other comments about your team project experience.
 - Good experience, rare to have.
